

FreezeChain

Real-time financial network intelligence

Team Dramatech Girls

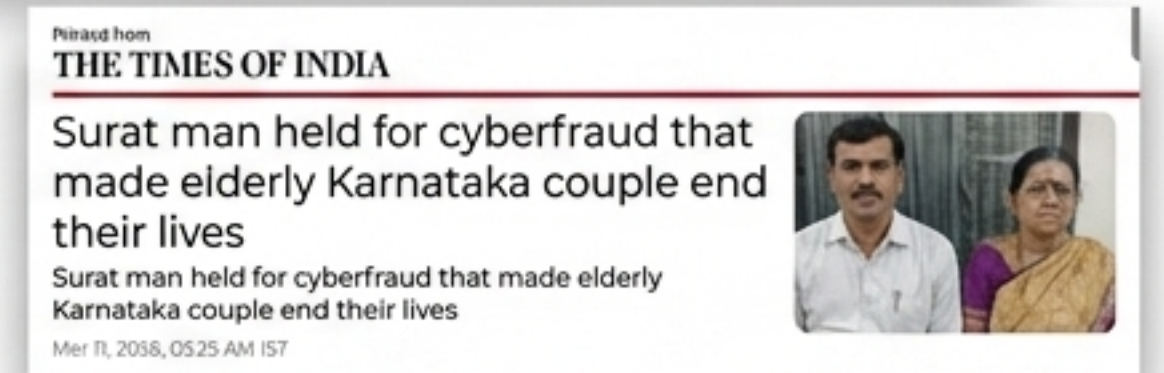

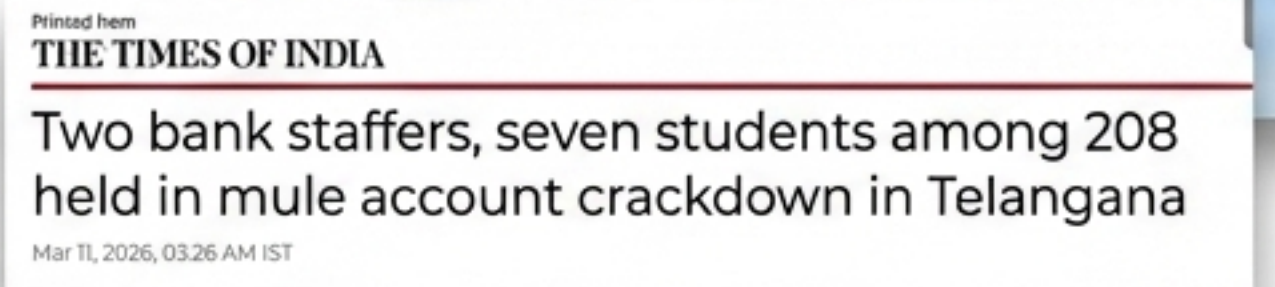

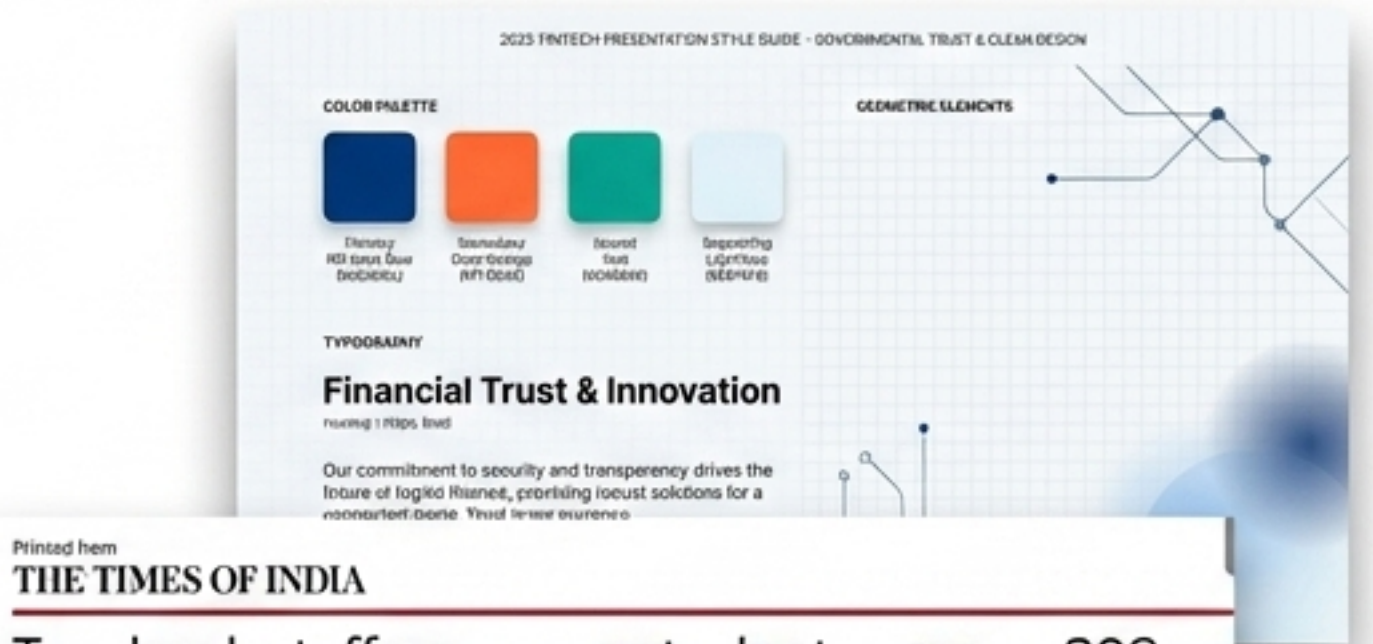

The Crisis

1 in 5 Indian families has experienced fraud

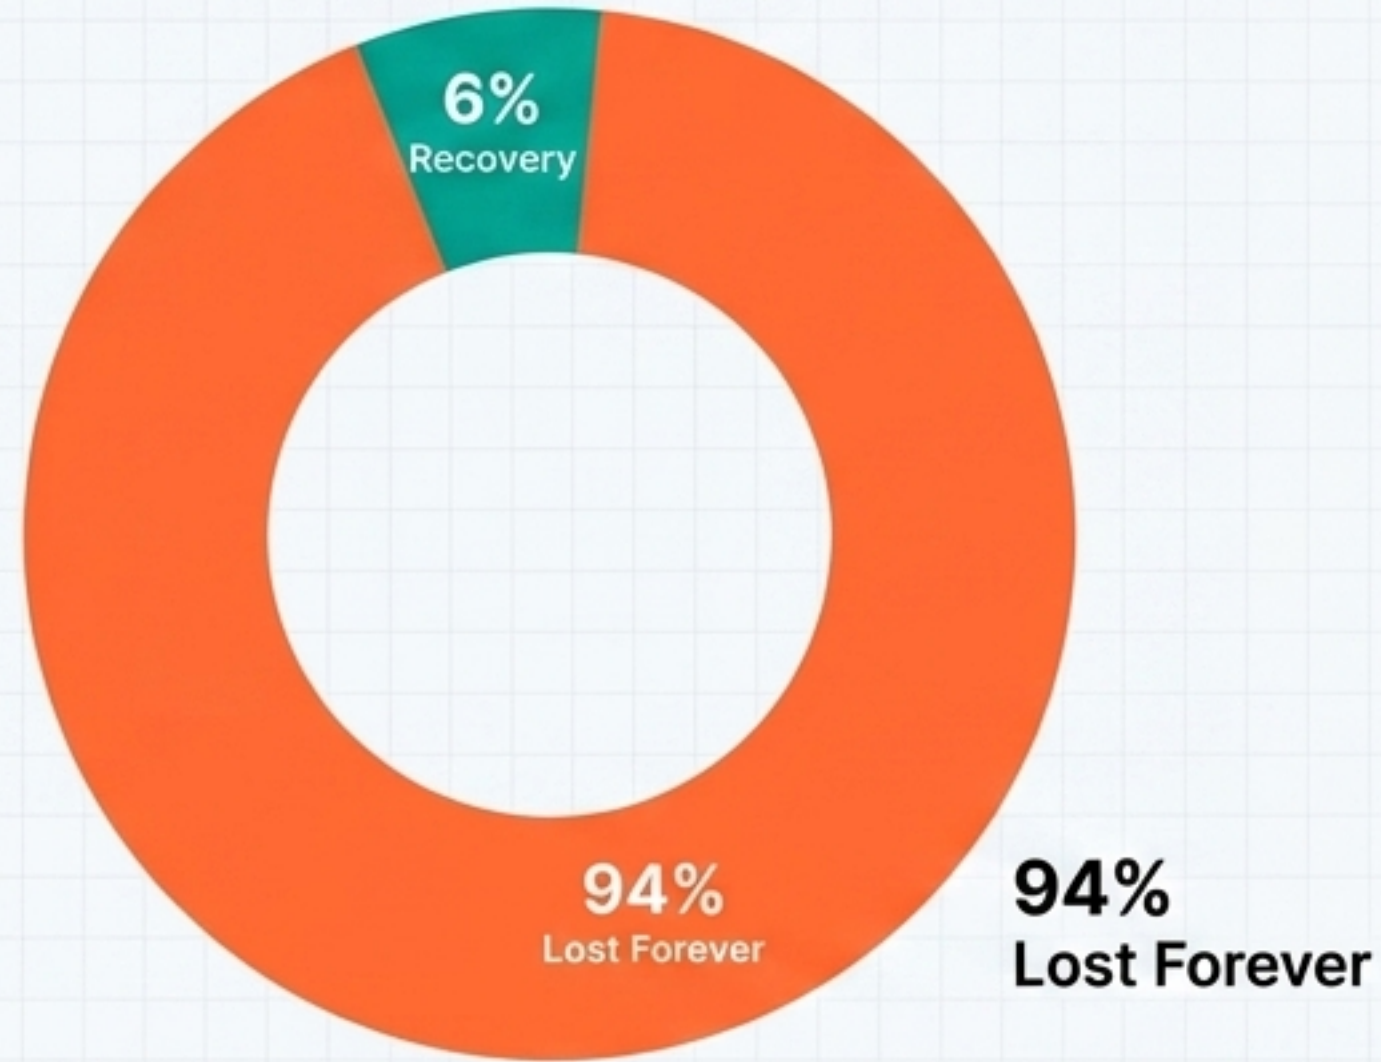

UPI fraud rose 85% in 2024

₹50 lakh lost | 11 accounts | 4 banks | 87 minutes

Every bank saw one transaction.
Nobody saw the chain.

The Reality

UPI Fraud Cases

2020 2021 2022 2023 2024

85%

Fraud spreads faster than detection

The Problem

Detection is siloed

Reports are isolated

No cross-bank visibility

Detection is local. Risk is systemic.

Bank run triggered by network panic

Inter Regular 22pt

Not a detection failure. A network failure.

What Exists Today

MuleHunter

Transaction-level detection

DPIP

Signal sharing framework

CIMS

Data collection system

Stops at detection. No propagation intelligence.

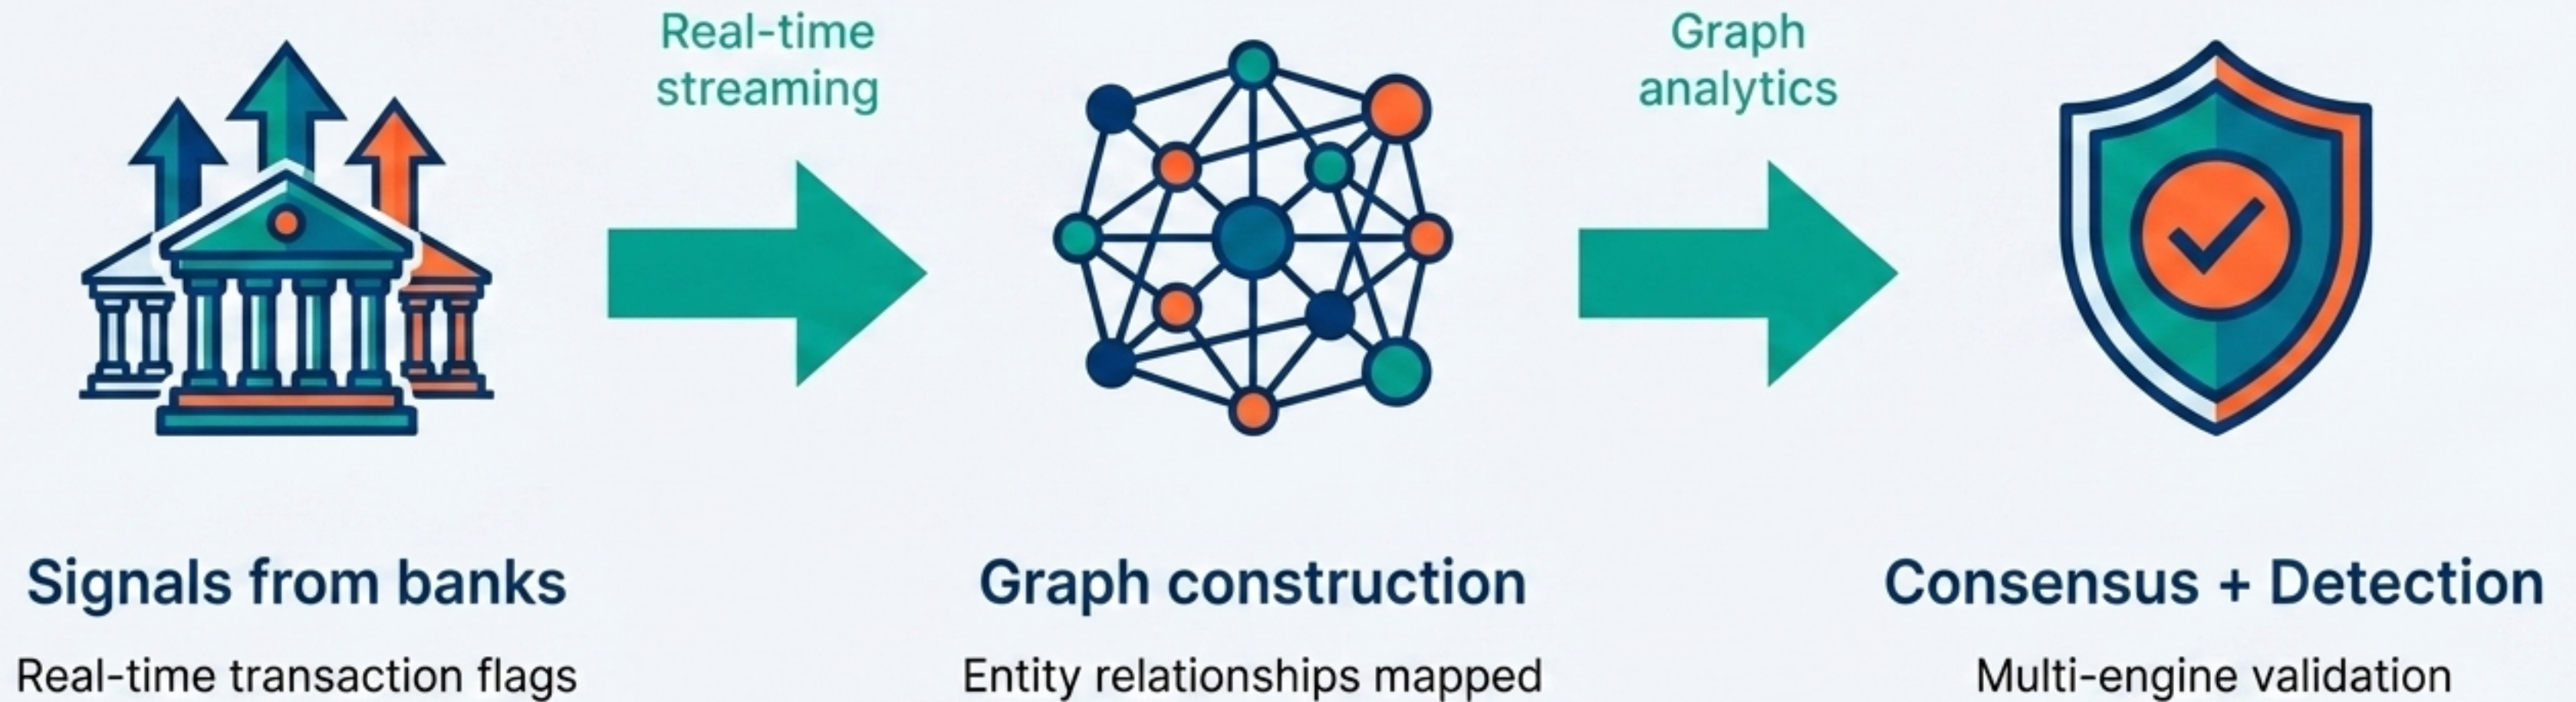

The Solution: FreezeChain

FreezeChain is a real-time network intelligence layer

- Models the entire financial system as a connected graph
- Tracks risk propagation across institutions in real-time
- Predicts cascade effects before they happen

How It Works

From isolated events → to network intelligence

Tech Stack

Frontend

- Next.js
- React
- TypeScript
- Force Graph

Backend

- FastAPI
- WebSockets
- Pydantic

Graph Engine

Inter Bold 28pt

- TigerGraph
- GSQL queries
- Real-time updates

Algorithms

Inter Bold 28pt

- PageRank
- Community Detection
- BFS Traversal

Key Features

- **Multi-engine consensus detection**
(2-of-3 validation)
- **Systemic Fragility Index**
(Network health scoring)
- **Cascade simulation**
(What-if analysis)
- **Evidence path tracing**
(Full transaction lineage)
- **Cross-bank visibility layer**
(Shared intelligence)

Demo + Performance

< 800ms

Full network traversal

< 2 seconds

Complete cascade analysis

Real-time

Live graph updates

Full network visibility in seconds

Impact + Closing

IMF 2025 Recommendation:

- **“Build a real-time systemic risk dashboard”**

FreezeChain delivers this — today.

**Fraudsters assumed banks cannot see each other.
We are here to make them wrong.**

Because your parents' savings deserve better than 6% recovery.
